the upperparts and a white tail tip. b; a closely related and comewhat similar Tasmanian bird (A. paradoxa) 2; wartize convenient similar tasmanian bird (A. paradoxa) 2; wartize convenient of the paradoxa o

wattle bark
wattle gum a gum arabic obtained from wattles (as Acacia
pyenaniha) in the form of reddish teats or lumps — compare

or element influences the adjacent ones and that may be in the form of an elastic deformation or of a variation of level or pressure, of electric or magnetic intensity, of electric potential, or of temperature — see LONGITUBINAL WAVE, TRANSVERS WAVE 9: a change in temperature or a period of hot or cold weather — compare COLD WAVE, NOT WAVE 20: TANTIS WAVE 1. SEATHS WAVE 1. SEATH

second order whose solutions describe wave phenomena (as the transverse vibrations of a stretched string) 2; 3 clind-distributions (as the transverse vibrations) 2; 3 clind-distributions (as the transverse vibrations) 3 wave form n: 2 curve that represents the condition of a wave propagating medium at a given instant and is usu, a graph in rectangular coordinates whose abscissas represent distances along the direction of propagation and whose ordinates along the direction of propagation and whose ordinates into or disturbance — called also were than opagated variation or disturbance — called also were than the points just reached by a vibrational disturbance in its propagation through a medium 2; a surface so drawn as to pass through those parts of a wave where the distortion or displacement of the medium through which the wave passes is everywhere the same wave function; a solution of the wave equation wave in the same wave function; and pipe of circular or rectangular cross section or a dislectric cylinder of such dimensions that it will propagate electromagnetic waves of a given frequency used for channeling ultrahigh-frequency waves in radio and television transmission because of the fow losts by attenuation and radiation wave hostight in the vertical distance between the trough of

radiation
wave height n: the vertical distance between the trough of a
wave and the following crest
wavelength \('\sigma'\), \('\sigma'\), the distance in the line of advance of a
wave from any one point to the next point at which at the
same instant there is the same phase (if N is the frequency of
the wave and \(\lambda\) their \(\sigma'\), their velocity of advance is the
product \((N \)\)

The distance is the product \((N \)\).

wave-usa \ wavis\ an : naving no wave: CALM. MAGFIR. UNAUFILED Wave-less\y adv: in a waveless manner wave-lot \wavis\n n-5 1: a little wave: RIPPLE 2: one of the dementary wave each with a point source of which and advancing wave front is the envelope - see HUVGERS PRIN-

bolding that elementary particips to be included in the properties and seeking a mathematical interpretation of the structure of matter on the basis of these properties wave-in-terpretation of the structure of matter on the basis of these properties wave-in-terpretation of the structure of matter on the desired to measure the wavelength or the frequency of an electromagnetic or radio signal wave moditing n : a modding with a profite that suggests one or more threaking waves — compare virtuiting Nethods. Network and related genera basing wave more threaking waves are supported to the wings wave modition n : the motion of the particles of a medium in mechanically propagated waves (as water waves or sound waves)

waves motor s : a prime mover engine actuated by waves of

waves)
wave motor n: a prime mover engine actuated by waves of water
wave number n: the number of waves per centimeter of light
of a given wavelength; the reciprocal of the wavelength of a given wavelength; the reciprocal of the wavelength of a given wavelength; specify a wave by the wave number.
